PROFILE

Motivated Management of Information Systems graduate with good technical skills and a passion for learning. Skilled in back-end development, and databases, with experience working on large projects using the Appian environment. A quick learner with excellent attention to detail and a commitment to continuous improvement. Seeking a challenging role in back-end development or quality assurance where I can leverage my technical skills and contribute to the success of the organization.

TECHNICAL SKILLS

- **Programming languages:** PHP, SQL, Java, HTML, and CSS.
- **Database:** phpMyAdmin and Oracle.
- **Tools and Platforms:** Appian environment, VS Code, and GitHub.

EXPERIENCE

JUNE – DECEMBER 2022

Database and Appian Software Developer | Experts Turnkey Solutions

- Worked on different large projects using the Appian environment.
- Good Database experience using MySQL and Oracle.

FEB – MAY 2022

Back-End Training | Knowledge Academy

- Good PHP and Database experience.
- Worked on different PHP native projects using admin and user templates, besides PHP, SQL, Bootstrap, and font-awesome.

FEB – APRIL 2021

Back-End Training | Ministry Of Telecommunications And It

- Built a mailing system project using an admin template besides HTML, CSS, and PHP language.

EDUCATION

JULY 2021

PROJECTS

- **Meetings Management System** to organize committees and meetings using the Appian environment.
- **Vehicle Maintenance Request Project** to create a detailed request to provide the required vehicle maintenance using the Appian environment.
- **Company HR System** to manage departments and employees in a company using the Appian environment.
- **Mailing System Project:** Built a website with multiple user interfaces, one enables the user to add a new mail by saving the mails data, and one enables the user to view all mail in the system (which can add a new mail, delete mail, or update mail information), one interface for adding a new payment method if it's not listed among the available payment methods, and another one through which a new user can be added to the system, to convert the mailing process to an electronic process.
