### PROJECTS

---

**Smart Socket, graduate project** [🔗](#) 2022  
It is a device that monitors the energy consumed in the electricity supply, controlling the flow of current, and other additions. The system is separated into two parts; the first one is the hardware, and the second part is the software, which contains a simple and easy-to-use android application. The system sends the sensed values from all sensors to the database (Firebase) and responds correctly to the command from the mobile application. it also sends notifications to the app in some cases.

<b>ChatApp</b> <a href="#">↗</a>	2022
Simple chat app in flutter & firebase.	
<b>ToDayDo</b> <a href="#">↗</a>	2022
To-do Flutter App with stage-management (provider).
