Bio

Software engineering graduate with 2 years of Flutter development experience and 1 year of full-stack web development experience, looking for opportunities with a team of developers and willing to travel for that.

Training Experience

Full-Stack web developer Intern, IVAS company

Mar 2021 – Sep 2021

- Developed front-end and back-end applications using HTML, JavaScript, and Laravel Framework.
- I Built SQL databases.
- I have developed web applications that use MVC and HMVC design patterns.
- I Participated in code reviews.

Projects

PALEX, Graduation project

- A Flutter mobile application that allows people to lend items, and exchange products, services, and languages.
- I used provider state management.
- I used firebase for the backend.
- I developed a chat system.
- I used the One Signal library for notifications.
- I integrated the app with Google sign-in authentication.
- I used Google Maps for locations and to show nearby offers.

HTCPCP (Hyper Text Coffee Pot)

- implemented the HTCPCP protocol for the coffee machine using JAVA.
- I built a command line interface to handle Client-Side requests.
- I used thread pool on Server Side to take 5 clients simultaneously.

Interactive educational app

- A Flutter app that displays world historical places with a puzzle game, questions, and videos about it.
- I developed a Jigsaw puzzle game.
- I used a library to show 3D models.
- I built a question/answer system.
- I used a YouTube library to display videos.
